BEPeterson, Inc. achieves ISO 9001:2015 certification

BEPeterson is pleased to announce that our Quality Management System has been certified as compliant with the International Standard **ISO 9001:2015**. BEPeterson is registered by NSAI and certified by IQNet as of February 15, 2011.

This achievement was a direct result of the entire organization working together in effectively developing and maintaining the Quality System in order to be registered. BEPeterson is meeting the growing demands of our customers and providing metal fabrications to the highest level of quality. This registration indicates BEPeterson's commitment to quality and to the continuous improvement of our management systems.

We look forward to meeting all of your future metal fabrication requirements.

BEPeterson

About BEPeterson

BEPeterson is a custom metal fabricator that serves customers worldwide in the fabrication of medium-to-large scale, heavy-gauge and often complex and large parts, equipment and components. In today's world, when your business relies on the fabrication of heavy-gauge metal parts and equipment, it's not enough for your vendor simply to have the necessary capabilities — for example, punching, shearing, plasma cutting, forming, rolling, welding, machining — to produce your designs. To compete effectively, you need a partner that provides the consistent predictability of costs, delivery and quality necessary to optimize profitability.

It all happens in our 88,000 sq. ft. facility in Avon, Massachusetts, where the business has been growing consistently since it's founding in 1935 to meet the diverse requirements of customers who operate in power and utilities, medical, chemical, environmental, filtration and other industrial markets throughout the world. Buyers in the power and utilities, medical, chemical, environmental/filtration and industrial marketplaces choose to partner with BEPeterson because they value the fact that BEPeterson offers more than mere fabrication capabilities. They understand that as a BEPeterson customer, you can optimize your profitability because: It's all about predictability. Have it in these critical areas of cost, delivery and quality and it becomes that much easier to predict and achieve higher profits.
