### **BEPeterson, Inc. Manufactures Filter Pressure Vessel for the Pall Corporation**

BEPeterson is pleased to announce the shipment of a Filter Pressure Vessel for the Pall Corporation, Cortland, NY. The ASME pressure vessel is a filter vessel manufactured to meet the design specifications required for Pall and the demands of the oil and gas refinery industry.

BEPeterson supplied a fully assembled and tested Stainless Steel Pressure Filter Vessel 20" OD x 186.75" OAL and Pressure Accumulator - 20" OD x 30" T/T. The Coalescer was included in the final assembly with all purchased valves, actuators and necessary components to assemble the Coalescer. The tubesheet / filter elements were welded in the vertical position.

# BEPeterson

## About BEPeterson

Since 1935 BEPeterson has set the standard for custom metal fabrication of heavy-gauge metal parts and equipment. BEP has been relied on by our customers to provide complete engineering, design and project management of the most critical components. We are ISO 9001:2015 certified and ASME certified. Our 88,000 square foot facility with high ceiling bays is one of the largest in the Northeast.

BEPeterson is both a high volume contract manufacturer and a custom metal fabricator. BEP utilizes advanced manufacturing techniques and low cost material procurement to supply consistent and repeatable high quality products to our customers.

BEP manufactures Pressure Vessels, Tanks, ASME pressure vessels & tanks, vacuum chambers, ASME vacuum furnaces, Pressure filter vessels, Filter housings, skid assemblies, Co-gen ducting and a variety of industrial general fabrications.
